

When to call 911

To report a fire.

If someone is ill or hurt and needs to go to a hospital.

If you see someone breaking the law.

If someone's life is in immediate danger.

How to call 911

If your home is on fire get out and call from outside or ask a neighbor to call.

Dial 9-1-1.

Tell the dispatcher your address.

Tell the dispatcher what's going on; what do you see.

Stay on the phone until help arrives or told to hang up by the dispatcher.

How to dial 911 on most smartphones with a locked screen

iPhone

1. Swipe up from bottom
2. Tap "emergency" in bottom left corner
3. Tap 9, 1, 1, then tap the green button

Android

1. Tap "emergency" on passcode screen
2. Tap "Call 911"
3. Tap "OK" when asked near bottom

Ask your parents or guardians to show you how to call 911 on their smartphone.

Don't actually dial 911 when practicing.

When and how to call 911

Smoke and CO Alarms

Fire Drills at home

What to do during a house fire

Smoke and Carbon Monoxide Alarms

They will tell you when to leave your house when there is a fire or other dangerous problem.

They make different sounds for different emergencies but they both mean “**GET OUT.**” Call 911 from outside the house.

Make sure you have working alarms in your home. Change batteries every six months.

Have adults test the alarms regularly. Listen to the sounds to know what they sound like. They are loud but they need to be to wake you up if you are sleeping.

Fire Drills At Home

Practice fire drills at home just like you do in school.

Know two ways out of your home.

Have your family pick a spot outside to be your meeting place, just like you have one for your classmates and teacher at school.

GET OUT when the alarm sounds or you see smoke or fire

Stay low to the floor. The smoke will rise and it will be hard to see and breathe if you stand up.

Feel doors and knobs for heat. Use the back of your hand. If it's hot don't open it and find another way out.

Go to your family's meeting place.

Call 911 from outside the house.

Never go back inside a burning building for anyone or anything.

If you know someone is still inside tell the 911 operator and arriving firefighters.

You can see and smell smoke.

But you **cannot** see or smell **carbon monoxide**.

So when that alarm sounds
GO OUTSIDE AND CALL 911.

Never play with matches, lighters or candles.

Never touch or play around the stove or other things that make flames or heat.

Stop, Drop and Roll

If you or your clothes are on fire...

Stop moving

Drop to the ground

Roll around and around on the ground to smother the flames
